

INDEX

To The Chicago Medical School Quarterly

Having long felt the need of an index to the great amount of material that has appeared in the **Quarterly** since its inception, we have compiled for our readers the following cumulative index. Contributions of only passing interest and limited medical value have been omitted from the subject division. On the other hand, the author section is a complete list of our contributors.

My sincerest thanks to all the members of the staff who participated in this tremendous undertaking, and without whose help it could never have been completed.

Howard C. Berger
Associate Editor

SOME LITTLE BUG

*In these days of indigestion
It is oftentimes a question
As to what to eat and what to leave alone;
For each microbe and bacillus
Has a different way to kill us,

And in time they always claim us for their own.
There are germs of every kind
In any food that you can find
In the market or upon the bill-of-fare.
Drinking water's just as risky
As the so-called deadly whisky,
And, it's often a mistake to breathe the air.

Some little bug is going to find you someday,
Some little bug will creep behind you some day,
Then he'll send for his bug friends
And all your earthly trouble ends;
Some little bug is going to find you some day.

The inviting green cucumber
Gets most everybody's number,
While the green corn has a system of its own;
Though a radish seems nutritious
Its behavior is quite vicious,
And a doctor will be coming to your home.
Eating lobster cooked or plain
Is only flirting with ptomaine,
While an oyster sometimes has a lot to say;
But the clams we eat in chowder
Make the angels chant the louder,
For they know that we'll be with them right
away.

Take a slice of nice fried onion
And you're fit for Dr. Munyon,
Apple dumplings kill you quicker than a train.
Chew a cheesy midnight "rabbit"*
